

GRC ENGINEERING PROGRAM – BATCH A2025

UPDATED TRAINING CALENDAR (Saturday-Based Schedule)

Effective Start Date: Saturday, 31 January 2026

Program Overview

The GRC Engineering Program equips learners with advanced knowledge and practical competencies in **Governance, Risk, and Compliance (GRC)**, emphasizing **cloud security, regulatory compliance, automation, and enterprise risk management**.

This phase of the program focuses on **cloud foundations, cloud security, emerging GRC trends, and a hands-on capstone project**, aligned with real-world industry requirements.

GRC301 Cloud Foundation

Credits: 4 Units

Duration: 3 Weeks

Week	Date Range (Sat–Fri)	Topic
Week 29	31 Jan – 6 Feb 2026	Introduction to Cloud Computing & AWS Core Services
Week 30	7 Feb – 13 Feb 2026	AWS Compute, Storage & Networking Services
Week 31	14 Feb – 20 Feb 2026	AWS Security, Identity & Compliance Services

GRC302 Cloud Security Foundation

Credits: 8 Units

Duration: 4 Weeks

Week	Date Range (Sat–Fri)	Topic
Week 32	21 Feb – 27 Feb 2026	Cloud Security Architecture & Shared Responsibility Model
Week 33	28 Feb – 6 Mar 2026	Cloud Compliance Frameworks
Week 34	7 Mar – 13 Mar 2026	Security Monitoring & Incident Response
Week 35	14 Mar – 20 Mar 2026	Cloud Governance, Policy Automation & Threat Management

GRC207 Emerging Trends in GRC

Credits: 2 Units
Duration: 2 Weeks

Week	Date Range (Sat–Fri)	Topic
Week 36	21 Mar – 27 Mar 2026	Cybersecurity Risk in Cloud and IoT Environments
Week 37	28 Mar – 3 Apr 2026	Regulatory Changes, Compliance Evolution & Global Standards

Phase 2 Competency Examination

Date	Activity
Saturday, 4 Apr 2026	Phase 2 Examination – Paper 1 (Objective)
Sunday, 5 Apr 2026	Phase 2 Examination – Paper 2 (Practical)
Monday–Tuesday, 6 – 7 Apr 2026	Phase 2 Examination – Paper 3 (Oral & Professional Defense)

GRC208 Capstone Project

Credits: 8 Units
Duration: 3 Weeks

Week	Date Range	Focus
Week 38	Wednesday, 8 Apr – Friday, 10 Apr 2026	Project Planning, Topic Approval & Architecture Design
Week 39	Saturday, 11 Apr – Friday, 17 Apr 2026	Implementation, Automation & Development
Week 40	Saturday, 18 Apr – Friday, 24 Apr 2026	Report Finalization, Review & Submission
—	Saturday, 25 Apr 2026	Final Presentations & Graduation Ceremony

Capstone Technical Focus Areas

Focus Area

- Deployment of GRC Automation Platform using AWS Cloud
- Cloud-based Risk Assessment Framework Implementation
- Automated Compliance Mapping (ISO 27001, NIST, PCI-DSS)
- Business Continuity and Incident Response Automation
- Executive Dashboard Development for Real-Time GRC Reporting
- Integration of Cloud Security Monitoring with GRC Workflows
- IAM and Policy Automation for Compliance

Technical Requirements

Requirement
Use AWS Lambda, CloudTrail, AWS Config, and Security Hub
Implement serverless GRC workflows
Automated compliance checks on cloud infrastructure
Cloud-native risk assessment tools
Executive dashboards using AWS QuickSight or equivalent

Program Completion Outcome

Upon successful completion, students will:

- Demonstrate applied **GRC engineering competence**
- Gain **cloud and security skills** aligned with industry standards
- Be prepared for advanced professional roles in **GRC, Cloud Security, and Compliance Engineering**
