Commencement of Academic Support Programme and Learner Online Platforms

Dear Parent/Guardian,

Now that Educator training, Awards Season and Interhouse activities have concluded, we would like to inform you that our Academic Support Programme will commence on Monday. This programme is designed to provide additional academic support to learners, strengthen performance, and address foundational gaps early. Our academic support interventions begin in Grade 8 as part of our long-term preparation for Grade 12. Attendance for designated learners is mandatory, and subject teachers will communicate via MyHub regarding which learners are required to attend specific sessions.

In addition, Curro has rolled out a comprehensive online learning portal, Moodle, across all subjects. Through this platform, learners will have access to the full curriculum, allowing them to work ahead, revise content, and access tests, past examination papers, and additional resources. This initiative aligns with our commitment to developing independent learners who take ownership of their studies at home. For Mathematics and Physical Sciences, learners are also expected to engage independently with both Siyavula and Moodle, as consistent practice is essential for mastery. Please find the attached link to access the learner portals, which can be accessed using learners' Curro login details. [Log in to the site | Curro Digital](#) - Learners will be trained at school on how to effectively use these digital platforms. One important aspect to note, however, is that accessing Moodle and Siyavula via a cellphone is not user-friendly and limits functionality. Investing in a tablet or laptop is therefore strongly recommended as a valuable long-term investment in your child's education. Please refer to the Stationery and Textbook Information Pack for the recommended device specifications.

Strict disciplinary measures will be applied for learners who are absent or arrive late without a valid reason. Should your child be unable to attend, we kindly request that you notify the subject teacher via email, providing a reason for their absence. Please note that learners must attend all sessions in full school uniform. Entry will not be permitted without adherence to this requirement. The tuckshop will not be operational on Saturdays; learners are therefore required to bring a packed lunch.

Once learners are on the school premises, they will not be permitted to leave, ensuring a safe, focused and productive learning environment. Learners not participating in any subjects on a particular day must remain productively engaged in a supervised class or ensure that appropriate transport arrangements are made.

We appreciate your continued support and partnership as we work together to ensure the academic success of our learners.

(Head of High School)
