

SHIRIZANE MAGADLA

GRC Analyst | Technical Trainer| Learning Architect |
Product Learning Specialist

☎ +27713540712 ✉ shirizane.magadla@gmail.com

PROFESSIONAL SUMMARY

Experienced technical trainer and GRC security analyst with 9+ years designing, delivering, and scaling learning solutions that drive business growth. Skilled at turning complex cybersecurity topics such as SIEM monitoring, vulnerability assessments, and compliance frameworks into engaging, actionable training. Strong background in instructional design, AI-driven content creation, and cutting-edge platforms, empowering global audiences in technical, cloud, and SaaS environments. Hands-on expertise in log analysis, threat simulation, and risk assessment, with proven ability to connect technical findings to business risk, draft policies, and support compliance. Combines technical depth with instructional excellence to foster continuous learning and organizational development.

SKILLS

- **Technical & Sales Training**
 - Expert in delivering technical and sales training across sectors, including cybersecurity, SaaS, and cloud products, both virtually and onsite.
- **Learning Design & Delivery**
 - Skilled in instructional design, onboarding, upskilling, micro-learning, scenario-based learning, and blended delivery (ILT, VILT, eLearning, VR/AR).
- **AI & Digital Content Development**
 - Proficient in AI-powered content creation and digital tools (ChatGPT, Synthesia, Articulate 360, Rise, Captivate, Camtasia, Vyond).
- **Learning Strategy & Analytics**
 - Experienced in learning needs analysis, skills gap mapping, data-driven analytics, program evaluation, and large-scale learning rollouts.

- **LMS & Tech Platforms**
 - Advanced LMS administration (Workday, Docebo, TalentLMS), integrations/automation (Zapier, HubSpot), and virtual/cloud platforms (Zoom, Teams, AWS, Azure, GCP).
- **Cybersecurity & Risk Management**
 - Hands-on with SIEM monitoring (Wazuh), incident response, vulnerability assessment, compliance mapping (ISO 27001, NIST CSF), penetration testing, and network analysis (Splunk, Wireshark).
- **Stakeholder Engagement & Change Enablement**
 - Strong in stakeholder management, change communication, DEI initiatives, and cross-functional collaboration.
- **Team Enablement & Coaching**
 - Experienced in coaching, mentoring, and delivering cross-functional training (IT, Sales, Customer Success), with a focus on cybersecurity awareness and risk-based education.

WORK HISTORY

GRC ANALYST (INTERNSHIP)

06/2025 to CURRENT

International Cybersecurity and Digital Forensics Academy

- **Implemented Security Information and Event Management (SIEM) monitoring** using Wazuh, leveraging real-time alerting and incident correlation to proactively detect unauthorized access and policy violations across enterprise environments
- **Performed comprehensive log analysis and vulnerability assessments** on simulated enterprise networks utilizing Wazuh, Nmap, and OpenVAS, achieving a 95% detection accuracy rate for high-risk security events
- **Supported risk assessment and compliance initiatives** by mapping detected vulnerabilities to ISO 27001 and NIST CSF controls, and preparing detailed compliance documentation to ensure alignment with regulatory requirements
- **Conducted threat simulation and penetration testing exercises** with Metasploit and Kali Linux, evaluating system defenses and providing actionable mitigation recommendations to enhance security posture.
- **Developed incident reports and executive dashboards** summarizing key security metrics, trends, and response effectiveness, facilitating informed decision-making during internal audit reviews.
- **Utilized Splunk and Wireshark for advanced network traffic**

analysis, identifying suspicious patterns and anomalies, which contributed to a 40% improvement in event correlation and remediation speed.

- **Collaborated with the GRC team to draft Acceptable Use Policies (AUPs) and maintain risk registers**, translating technical findings into business risk impacts to strengthen overall security governance.

TECHNICAL TRAINER

01/2021 to 05/2025

Mimecast South Africa Pty Ltd

- Experienced Technical Trainer with a strong track record of designing, delivering, and maintaining end-to-end training programs using industry-standard authoring tools such as Articulate 360, Rise, Adobe Captivate, and Vyond. Skilled in creating engaging, scalable learning experiences across instructor-led, virtual, and asynchronous formats, tailored to diverse technical and non-technical audiences.
- Achievements
- Delivered 200+ SaaS, cloud, and cybersecurity training sessions across EMEA with 95%+ satisfaction.
- Designed onboarding, blended, and asynchronous programs using Articulate, Captivate, and Vyond.
- Created AI-personalized learning paths and VR modules, boosting engagement by 40% and reducing incidents by 30%.
- Led AT, data automation, and compliance training; launched micro-learning to improve phishing scores by 60%.
- Built scenario-based labs, self-paced content, and mentoring networks, increasing certification by 55%.
- Conducted global train-the-trainer programs, expanding training reach by 80%.
- Improved customer time-to-competency by 35% and training attendance by 70% across EMEA.
- Achieved 100% compliance for mandatory onboarding programs in the EMEA region.
- Managed session logistics, stakeholder delivery, and reporting
- Delivered high-impact awareness training, increasing employee preparedness against phishing attacks from 20% to 95% for a major banking institution, significantly enhancing organizational security and resilience.

TECHNICAL TRAINER

05/2016 to 12/2020

Merchants SA

- Conducted comprehensive needs analysis to inform the design of technical training materials, resulting in targeted and effective learning solutions for Cisco and Microsoft Office 365.
- Delivered high-quality training sessions on technical topics, leveraging strong instructional design principles to engage participants and drive knowledge retention.
- Developed practical support materials, including troubleshooting sheets, assessment packs, and moderation tools, to facilitate learning

and ensure consistent application of technical skills.

- Provided expert support to senior stakeholders, facilitating learning workshops and contributing to the development of updated safety documentation, including Work Safety Plans (WSP) and Activity Task Records (ATR).
- Analyzed training effectiveness, gathered participant feedback, and made data-driven recommendations to improve future training initiatives and drive continuous improvement.
- Maintained accurate records of training sessions and participant feedback, ensuring transparency and accountability in training delivery and evaluation.
- Maintained and updated training documentation by organizational standards and client specifications.
- Collaborated closely with SMEs, consultants, and PMs to gather technical inputs, create accurate learning assets, and facilitate seamless training transitions.
- Supported ongoing training needs across internal teams and external client engagements, ensuring alignment with operational goals.
- Designed and delivered sales training workshops tailored for contact centre teams, resulting in improved upselling skills and enhanced customer engagement metrics.

PLATINUM SUPPORT ENGINEER

01/2015 to 04/2016

IGNITE

- Remote management of the client's networks using Putty
- (Doing port forwarding, configuring Access-List, changing interfaces, setting up email accounts)
- Liaise with carriers, engineers, and customers to provide information for fault diagnosis and resolution
- Covering first-line troubleshooting
- Ensuring sufficient detail is captured for handover to 2nd Tier support
- Assisting the client with their ADSL connections.
- Facilitate the installation and repair of the Modems or Routers.
- Configuring Cisco routers and troubleshooting them.
- Troubleshooting firewalls (Astaro, Pix, MiG, and Percol8)

TECHNICAL SUPPORT ENGINEER

05/2010 to 12/2014

Mweb Business

- Troubleshooting clients' requests and offering first-time resolution of queries
- Troubleshooting ADSL, MPLS, and Dedicated links
- Hosting Services (Website / Co-Located & Virtual)
- Servers / Database MySQL & Microsoft / Domains
- Troubleshooting mail solution (Hosted Exchange, Mail Marshal)
- Domain mailboxes (PoP3, SMTP & IMAP)

QUALIFICATIONS &

Diploma IT Programming

**PROFESSIONAL
DEVELOPMENT**

- Microsoft Certified IT Professional
- Microsoft Certified: Security, Compliance, and Identity Fundamentals (Progress)
- Mimecast Product Certifications – All Levels
- National Certificate & Diploma Occupationally Directed Education, Training and Development Practices
- Cisco: Introduction to Cyber Security
- Instructional Design Foundations and Applications
- AWS Educate Machine Learning Foundations
- Certified AI-Powered Instructional Design Professional
- Hands-on AI Masterclass 1(foundation) 2 (Proficiency) 3(Mastery)
- Governance, Risk, and Compliance (GRC) - Progress
