Dear Hiring Manager,

I am excited to apply for the GRC position at Scytale. With over nine years of experience in technical training, cybersecurity, and GRC analysis, I am confident in my ability to guide SaaS customers through complex compliance processes and deliver exceptional support that builds trust and drives business growth.

In my recent role as a GRC Analyst at the International Cybersecurity and Digital Forensics Academy, I implemented SIEM monitoring, conducted vulnerability assessments, and mapped findings to ISO 27001 and NIST CSF controls. I have hands-on experience preparing compliance documentation, supporting risk assessments, and drafting policies that align with regulatory requirements. My work directly contributed to improved detection accuracy and faster remediation, ensuring organizations were well-prepared for audits and internal reviews. Previously, as a Technical Trainer at Mimecast, I designed and delivered over 200 training sessions on SaaS, cloud, and cybersecurity topics across EMEA, achieving a satisfaction rate of 95%+.

I created engaging, scenario-based learning experiences and compliance training that enhanced phishing resilience and ensured 100% onboarding compliance. My ability to translate complex technical concepts into actionable guidance has empowered both technical and non-technical stakeholders to meet their compliance objectives.

I excel at managing multiple projects, meeting strict deadlines, and utilizing technology platforms such as Splunk, Wazuh, and advanced LMS systems. My strong communication skills, solution-oriented mindset, and experience in stakeholder engagement help me build long-term client relationships and provide practical support throughout the compliance process. While my formal qualifications include a Diploma in IT Programming and multiple industry certifications (including Microsoft Security, Compliance, and Identity Fundamentals, and Cisco Cyber Security), I am actively pursuing additional GRC and information security credentials to enhance my expertise.

I am particularly drawn to Scytale's mission of delivering top-tier compliance solutions and driving product improvements based on customer feedback. I am eager to contribute my technical depth, instructional excellence, and passion for continuous improvement to your dynamic team.

Thank you for reviewing my application. I look forward to discussing how my background and skills can contribute to Scytale's ongoing growth and success.

Sincerely,
Shirizane Magadla
