Core Competencies

- **Governance, Risk & Compliance (GRC) Analyst | SIEM, ISO & NIST Specialist | Cyber Risk & Compliance Enablement**
- Governance, Risk & Compliance (GRC)
- Cybersecurity Awareness & Enablement
- SIEM Monitoring & Log Analysis
- Vulnerability Assessment & Risk Mapping
- ISO 27001, ISO 27701 & ISO 42001 Implementation
- NIST CSF & Regulatory Compliance
- Technical & Sales Enablement Training
- Instructional Design & Learning Architecture
- AI-Powered Learning Content Development
- LMS Administration & Learning Analytics
- Cloud, SaaS & Security Product Training
- Incident Response & Threat Simulation
- Stakeholder Engagement & Change Enablement
- Learning Needs Analysis & Skills Mapping
- Executive Reporting & Security Dashboards

Education

- Diploma: IT Programming
- National Certificate & Diploma: Occupationally Directed Education, Training & Development Practices

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

- ISO 27701 Lead Implementer – ICDFA
- ISO 42001 Lead Implementer – ICDFA
- Governance, Risk & Compliance (GRC) – In Progress
- Mimecast Product Certifications – All Levels
- Certified AI-Powered Instructional Design Professional
- Hands-on AI Masterclass (Foundation, Proficiency, Mastery)
- Instructional Design: Foundations & Applications
- AWS Educate: Machine Learning Foundations
- Cisco: Introduction to Cybersecurity
- Microsoft Certified IT Professional

Career Objective

Experienced Technical Trainer and GRC Security Analyst with a proven track record of designing, delivering, and scaling enterprise learning and cybersecurity programs. Highly skilled in simplifying complex topics such as SIEM monitoring, vulnerability management, threat simulation, and ISO/NIST compliance into engaging, measurable learning solutions. Strong expertise in AI-powered content creation, LMS administration, instructional design, and analytics, combined with hands-on cybersecurity experience. Recognized for bridging technical findings with business risk, drafting governance policies, and driving continuous organizational learning.

Work Experience

GRC ANALYST International Cybersecurity and Digital Forensics Academy (ICDFA) 06/2025 – Present

- Implement SIEM monitoring using Wazuh for real-time threat detection.
- Perform advanced log analysis across simulated enterprise environments.
- Conduct vulnerability assessments using Nmap and OpenVAS.
- Execute threat simulations and penetration testing with Kali Linux.
- Map security findings to ISO 27001 and NIST CSF controls.
- Support compliance documentation and audit readiness activities.
- Develop incident reports and executive-level dashboards.
- Analyze network traffic using Splunk and Wireshark.
- Identify anomalous patterns to improve event correlation accuracy.
- Draft Acceptable Use Policies (AUPs) and governance documents.
- Maintain enterprise risk registers and mitigation plans.
- Translate technical vulnerabilities into business risk insights.

TECHNICAL TRAINER Mimecast South Africa (Pty) Ltd 01/2021 – 05/2025

- Design and deliver global SaaS, cloud, and cybersecurity training programs.
- Develop blended learning solutions using Articulate 360, Rise, and Captivate.
- Deliver instructor-led, virtual, and asynchronous training across EMEA.
- Create AI-personalized learning paths and immersive learning modules.
- Lead cybersecurity awareness, phishing, and compliance training initiatives.
- Build scenario-based labs and hands-on technical simulations.
- Conduct train-the-trainer programs to scale enablement reach.
- Improve customer time-to-competency through structured onboarding.

- Manage LMS reporting, session logistics, and stakeholder communication.
- Drive microlearning strategies to improve security behavior outcomes.
- Support sales, IT, and customer success enablement programs.
- Deliver executive-ready training impact and compliance reports.

TECHNICAL TRAINER

Merchants SA

05/2016 – 12/2020

- Conduct training needs analysis for technical and operational teams.
- Design learning materials for Cisco and Microsoft Office 365.
- Deliver instructor-led technical and sales training programs.
- Develop troubleshooting guides, assessments, and moderation tools.
- Support senior stakeholders with workshops and learning facilitation.
- Contribute to safety documentation including WSPs and ATRs.
- Analyze training effectiveness and recommend continuous improvements.
- Maintain accurate training records and compliance documentation.
- Collaborate with SMEs and project teams for content accuracy.
- Update and maintain standardized training documentation.
- Support internal and external client learning initiatives.
- Deliver sales enablement workshops for contact centre teams.

PLATINUM SUPPORT ENGINEER

Ignite

01/2015 – 04/2016

- Provide remote network management using PuTTY and CLI tools.
- Configure routers, firewalls, and access control lists.
- Perform first-line and second-line technical troubleshooting.
- Support ADSL connectivity and network performance issues.
- Facilitate modem and router installations and repairs.
- Configure Cisco routers and network interfaces.
- Troubleshoot enterprise firewalls and security appliances.
- Liaise with carriers and field engineers for fault resolution.
- Capture detailed incident data for escalation processes.
- Support email and port forwarding configurations.
- Ensure accurate handover to Tier 2 support teams.
- Maintain customer communication during outages and incidents.

TECHNICAL SUPPORT ENGINEER

MWEB Business

05/2010 – 12/2014

- Provide first-time resolution for business client technical queries.
- Troubleshoot ADSL, MPLS, and dedicated network links.
- Support hosting, co-located, and virtual server environments.
- Maintain and troubleshoot MySQL and Microsoft servers.
- Support domain, DNS, and email services.
- Troubleshoot hosted Exchange and MailMarshal solutions.
- Resolve POP3, SMTP, and IMAP mailbox issues.
- Log and track incidents through ticketing systems.
- Escalate complex issues to senior technical teams.
- Ensure SLA adherence and customer satisfaction.
- Document solutions for knowledge base updates.
- Support enterprise connectivity and infrastructure services.
