

Shirizane Magadla

To Hiring Panel:

I am writing to formally apply for a suitable position within your organization where my combined expertise in Governance, Risk and Compliance (GRC), cybersecurity enablement, and technical training can add immediate value. With over nine years of progressive experience across cybersecurity, SaaS, cloud technologies, and enterprise learning environments, I bring a strong blend of technical depth, compliance insight, and instructional excellence.

In my most recent role as a GRC Analyst at the International Cybersecurity and Digital Forensics Academy, I supported enterprise security governance through SIEM monitoring, vulnerability assessments, threat simulations, and compliance mapping aligned to ISO 27001 and NIST CSF frameworks. I contributed to incident reporting, executive dashboards, and policy development, translating complex technical findings into clear business risk insights to support audits and decision-making.

Previously, as a Technical Trainer at Mimecast, I designed and delivered large-scale cybersecurity, SaaS, and cloud training programs across the EMEA region. I successfully led onboarding, compliance, phishing awareness, and role-based enablement initiatives, achieving measurable improvements in user readiness, certification rates, and security posture. My work leveraged AI-powered instructional design, blended learning strategies, and advanced LMS platforms to drive engagement, scalability, and performance outcomes.

Throughout my career, I have consistently demonstrated the ability to bridge technical operations with business objectives, whether through enabling secure user behavior, supporting compliance initiatives, or developing learning strategies that accelerate time-to-competency. I am particularly skilled in stakeholder engagement, cross-functional collaboration, and change enablement within regulated and fast-paced environments.

I hold a Diploma in IT Programming, a National Certificate and Diploma in Education, Training and Development Practices, and multiple professional certifications, including ISO 27701 and ISO 42001 Lead Implementer credentials. I am deeply committed to continuous learning and staying aligned with evolving cybersecurity, AI, and governance standards.

I would welcome the opportunity to discuss how my experience, technical expertise, and passion for secure enablement can contribute to your organization's success. Thank you for considering my application.

Yours sincerely,
Shirizane Magadla
